## PREFACE

*Computer Security and Information Integrity* are areas of vital importance whose significance is only just being recognised by the general public. The programme committee for IFIP/SEC'90 had an interesting and challenging job selecting papers from among the many submitted, which cover all major aspects of the field and report on the most recent developments. As in several earlier IFIP/Sec conferences, there was a strong emphasis on the practical aspects of providing computer security and information integrity.

IFIP/SEC'90 was the Sixth International Computer Security Conference sponsored by IFIP (International Federation for Information Processing) and under the auspices of Technical Committee, TC 11 (Security and Protection in Information Processing Systems).

We would like to thank all those involved in making IFIP/Sec'90 a success and look forward to meeting next year in Brighton, England.

Klaus Dittrich and Juhani Saari

## TABLE OF CONTENTS

Preface	v
L. Arnkil and E. Einola POS Security – State of Art in Finland	1
K. Bauknecht and C. Strauss Portfolio Techniques to Support Risk Management and Security	9
J.G. Beatson Security – A Personnel Issue The Importance of Personnel Attitudes and Security Education	29
I. Bentzien EDP Safety and Usage	39
D. Bonyun and G. Jones A Knowledge Based Method of Managing Risks in Dynamic Environments	47
K. Brunnstein and S. Fischer-Hübner Risk Analysis of "Trusted Computer Systems"	71
R.K. Burns A Relational DBMS Security Policy	89
H. Cnudde CRYPTTEL: The Practical Protection of an Existing Electronic Mail System	107
C. Cresson Wood Planning as a Means to Achieve Appropriate Data Communications Security	119
R. Dierstein The Concept of Secure Information Processing Systems and Their Basic Functions	133
J. Dobson A Methodology for Analysing Human and Computer-Related Issues in Secure Systems	151

W. Fumy and A. Pfau Asymmetric Authentication Schemes for Smart Cards – Dream or Reality?	171
R. Hackworth Contingency Planning – Managing the External Impacts of System Security Failures	181
H.J. Highland Computer Viruses: Factors to Consider Before Purchasing an Anti-Virus Product	189
D.B. Holden The Digital Distributed System Security Architecture	203
S. Kowalski Computer Ethics and Computer Abuse: A Longitudinal Study of Swedish University Students	211
M.P.J. Kratz and P.J. Johnston Managing the Virus Risk	233
K.E. Kristiansen Information Systems Auditing – A Support to Management	245
K.H. Krueger Planning for Disaster Recovery in a Multi-Vendor, Networked Computing Environment	255
Y. Le Roux Technical Criteria for Security Evaluation of Information Technology Products	265
J. Lobel Proactive Network Risk Management	275
W. Madsen Data Privacy: Legislation and Intelligence Agency Threats	297
R.R. Moeller Separation of Duties Audit Concerns and the Clark-Wilson Data Integrity Model	319
S. Muftic Security in Open Distributed Processing (ODP) Systems	333

R. Paans and H. de Lange Auditing the SNA/SNI Environment	351
D.B. Parker Seventeen Information Security Myths Debunked	363
H.P. Rieß Modeling Security in Distributed Systems	371
B. Sarton and P. Capiteijns Corporate Information Security Policy... A Paper Tiger?	383
P.M. Stanley Computer Assisted Investigation of Computer Crime	389
M. Tantam Trouble Ahead: Information Crime and Jurisdiction	403
L.T. Taylor Case Tools and Security: A Solution or a Problem?	413
